

# CHECKMATE eALERT

**Safety for All Workers in Any Situation**

- How do you protect employees working directly with the public and what happens when someone they're interacting with becomes aggressive?
- How do you protect employees who meet one-on-one with customers behind closed doors?
- How do schools and universities protect teachers and staff when a student gets violent?

**Protect your employees working at their computers  
with no additional hardware or software to purchase**

NOTIFICATION

**Install CHECKMATE eALERT on every computer that your frontline employees use**

**CHECKMATE eALERT** is a set of **customizable Emergency Buttons** pinned to any computer taskbar, instantly enhancing and complimenting emergency protocols.

By simply clicking on one of the Emergency buttons, an alarm is sent to ProTELEC's Emergency Monitoring Centre where professionally-trained staff will respond to the specific type of emergency alert.

Police can be notified, medical help dispatched and key onsite employees alerted by phone and email, with all responses tailored to meet your organization's specific needs.

**CHECKMATE eALERT is suitable for all workplaces and ideal for organizations  
where staff routinely interact with members of the public**
